L. A. Szuhay
LTV Steel Company
Corporate Environmental Control Department
3100 East 45th Street
Cleveland, Ohio 44127

Dear Mr. Szuhay:

The subject hazardous waste management facility was inspected by a representative of this Agency on August 7, 1986. The inspection revealed that the closure of the waste pile (S03) was completed in accordance with the approved closure plan dated January 21, 1986.

Certification that the waste pile had been closed in accordance with the approved closure plan by the owner/operator, LTV Steel Company, and an independent registered professional engineer, Robert Mahan, of Illinois was received at this Agency July 18, 1986.

The Agency has determined that the closure of the waste pile (S03) at this facility has apparently met the requirements of Interim Status Standards, 35 Ill. Adm. Code, Part 725.

Please note that LTV's closure certification for its container storage area (S01) is not being approved. Also note that the Agency has not modified your facility's Part A Application at this time, but expects to act on the Part A following resubmittal of LTV's closure certification for its container storage area (S01). Based on a letter from L. A. Szuhay dated November 24, 1987, the Agency is expecting this recertification on or about March 1, 1988.
